

Gold Medal fleet twins... the O'Day 23 Fixed Top... and the O'Day 23 Pop Top... two racing and family cruising models in the O'Day tradition

C. Raymond Hunt Associates designed the hull and rig, while Andrew T. Kostanecki, Inc. designed the accommodations and engineered the expanding 23 Pop Top cabin concept (design patent pending). This team of specialists have designed a pair of 23 footers approaching the cruising comfort of many 30 footers... with the great sailing performance.

The Gold Medal Twins... the O'Day 23 Fixed Top and the O'Day 23 Pop Top.

The lockable cabin configuration on both models is just about the same with the emphasis on cruising comfort... berths for five adults... convertible dinette... a galley area... hanging locker... and head area for marine toilet or self-contained unit. In the fixed top model there exists a full bulkhead with a sliding door to separate forward/head area from the main cabin. Secure stowage is provided beneath all bunks, the dinette and galley counter.

## INTRODUCING THE O'DAY 23

**We didn't invent the compact cruiser.  
We simply made it work better.**

The O'Day 23 is a brand-new family cruiser. A boat that solves a lot of problems.

Unlike some other trailerboats, she's big inside, with a full 5' headroom, 8' beam, for extra room below.

Unlike many roomy boats, she's also fast. We gave her 235 sq. ft. of sail, a 5'6" centerboard and 900 lbs. of ballast so she'll move than hold her own with other boats her size.

Finally, she's easy to trailer. Her keel (board up) draws 2' 2" - for short draft sailing and quick launching.

### DECK PLAN

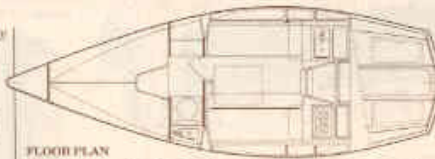

The wonkid pattern isn't just for looks. It keeps your feet on deck. All pulpit, winches, cleats are thru-hull so they won't let go.

There's an anchor locker forward, and a cockpit locker for your outboard motor.

The cockpit is self-bailing. The covering high enough to keep you dry and secure.

### O'DAY 23 SPECIFICATIONS

Overall length	27' 2"
Waterline length	26' 0"
Beam	8'
Deck extension	2' 2"
Depth maximum	2' 6"
Sail area	235
C/D keel weight (approx.)	900
Sailing displacement	3,000
Designer	C. Raymond Hunt

### FLOOR PLAN

The cabin fits together like a waltz. Four 6" louvers, private head with sink, toilet, hanging locker, and dining table. Plus a galley sink and stove that slide aft under the cockpit when they're not in use.

### SECTION PLAN

Another view of the 23's cabin shows how unique double berth berths work. The backrests slide up and down. In place beside the settee berth - giving you a double sleeping area.
